

Are you Hep C Free?

Find out in 2 simple steps

Step 1

Ask yourself the following questions...

Have I been exposed to any direct blood-to-blood contact (i.e. needle or syringe use)?

Have I been exposed to the blood of someone living with hepatitis C?

Was I born in the U.S. between 1945-1965?

Step 2

If you answered yes to any of these questions, get tested for hepatitis C!

Hepatitis C antibody (anti-HCV)

This shows if you have been exposed to hepatitis C.

About 1 out of 4 people clear the virus on their own.

If you test positive, make sure to get a viral load test.

Hepatitis C viral load (HCV RNA PCR)

This shows if you have chronic (long-term) hepatitis C.

Bring this form to your doctor!

Dear Dr. _____,

I would like to:

___ Get tested for hep C.

___ Know my hep C status.

I think that I've already been tested but am not certain.

	CPT Codes
86803	Hepatitis C antibody

If you don't have a doctor or insurance, free or low-cost testing resources are listed on the back.
